
FINE ART
FOR YOUR HOME

PHOTOGRAPHIC *Walsh* DESIGN

Walsh Photographic Design uses special software to show you exactly what your photos will look like on your wall. In order to show you your images on your wall, we'll need a photo of your wall to use in the software. Here are a few tips for getting us the best photo possible:

1

Tape a "letter" size (8.5" x 11") piece of paper on the wall where you'd like your portraits.

2

Take a horizontal picture of that wall (with the paper on it) with your camera, smartphone or tablet, from a comfortable viewing distance. This is typically from all the way across the room, unless you have a very large room.

3

Once you've taken pictures of all of the walls where you'd like artwork, please email them to:

info@walshphotography.com

- Thank You!

*Helping you envision
the possibilities
for living with fine art.*
